Chamblee Elected President of Coop Consolidation

Belle Glade Farmers Coop And Pioneer Growers Join At Meeting

Members of the Belle Glade Farmers Cooperative and the Pioneer Growers Cooperative effected consolidation of the two plants to go under the name Pioneer Growers Cooperative at a meeting Wednesday morning at the plant. J. H. Chamblee was elected president by the board of directors to serve until the annual meeting.

James Ball and Frank Doolley were elected vice president and secretary-treasurer respectively.

Board of directors elected includes: Arthur Wells, Fritz Stein, Frank Wilson, A. J. Sullivan, L. M. James, James Ball and J. H. Chamblee.

At the annual meeting, scheduled for the second Tuesday in October, officers for the year will be elected.

Directors were granted authority to proceed with details of consolidation and expansion and enlargement of pre-cooling facilities.

The former Belle Glade Farmers plant will be used for packing vegetables requiring pre-cooling including celery, corn and green vegetables.

Pioneer Growers plants will service beans, lima, potatoes, peppers, eggplants and other produce.

Mystery Bridge Of Kraemer Is Found

Mystery of the Kraemer Island Bridge, lost three years ago, was cleared up by the discovery of the bridge, connecting Kraemer Island with the Chosen mainland lost in the 1947 hurricane. It was discovered in a recent search.

The find set in motion another air canvas for the replacement bridge lost a year ago.

The twelve spans found by Fritz Stein and helpers were partly submerged and hidden under willows half a mile from its original site. Timbers in the salvaged section are valued at \$2,000 and will be used in replacing other county bridges.

County Road Superintendent, J. K. Baker and crew are taking charge.

The replacement bridge was washed away in the 1949 hurricane. Fate of this bridge has not been discovered yet. It will be replaced with a third bridge and a three mile road built to connect it with state highway at Chosen.

Dusting aviators and amateur fishermen are cooperating with the county in the search for the second bridge.

McGREGOR TO SPEAK AT CATTLEMAN MEET

James A. McGregor, assistant industrialist of the state office in Gainesville, will speak at the meeting of the county Cattleman Association Thursday at 8 p. m. in the City Hall.

All cattlemen are invited to attend the meeting, including a new list there are 34 new cattlemen since last year, says H. L. Speer, assistant county manager.

Association business will be discussed following the address.

PAR-TEE LINE

Everglades Country Club of the

By Annie Pearson

A juke-box dance is scheduled for Saturday night at the club, according to Jimmy Williams, manager.

Winners of the women's golf tournament are: Mrs. E. A. McCabe, first; Mrs. C. J. Kapp, second; and Mrs. Bennie Wells, consolation first runner up.

Mrs. Leland Pearce and Mrs. Arthur Jones are scheduled to compete for top place in the second flight.

60% FLA. CATTLE SELL AT LIVESTOCK MARKETS

Sixty percent of Florida's livestock sold through the 25 auction markets located from Arcadia to Quincy, The Florida Cattleman reports in its annual Marketing Issue, in the mails this week.

The Cattleman is official publication for the Florida State Cattleman's Association, and is published by Cody Publications, Inc. Bob Cody is editor.

The article reports that an estimated 217,000 head of cattle during the 12 months ending June 30, at an estimated total sales price of \$1,800,000, the magazine reports. In addition, these marts handled 383,445 head of swine valued at \$7,187,283. The Cattleman's survey shows.

The special issue ran 56 pages, and featured articles on livestock loss prevention through proper handling of livestock in markets and on farm feed lots.

Dr. Oliver F. Goen of the extension service in Gainesville, in a special article reports that \$894,200 pounds of meat was lost in 1949 as a result of animals killed or crippled in shipment to slaughterhouses.

Dr. A. M. Pearson and Dr. R. S. Glasscock pointed out that bruises received by animals in handling are a major industry problem.

The August issue also reviews the new standard of perfection for the American Brahman Breeders' Association, and a new circular issued by the U.S.D.A. on Brahman crosses in the Gulf Coast area.

Prof. F. W. Parvin, associate economist at Gainesville, in a special article reports on levels for beef through next Spring, based on a high level of purchasing power throughout the country.

Lions Convention Packed Event, Say Local Delegates

"We were just six of 30,000 Lions from 28 countries, but we left our footprints on the big map," said Robert B. Hines, scribbling local delegates who attended the 33rd annual Lions International convention July 24-28 in Chicago.

Local representatives were Mr. and Mrs. Emmett Roberts, Mr. and Mrs. E. H. Hotard and Mr. and Mrs. Herman Cook.

Delegates were so much into it, it was impossible to cover everything about which we made a long tape, Roberts tells. The exchange program included everything from talks by leading Lions and national leaders to the best in talent and entertainment.

The ten dollar bill of tickets opened the Chicago world.

After enrolling at the Bismarck Hotel in the heart of town which was provided for Florida delegations, local Lions and their wives began the swift round of activities occurring at the mammoth Chicago Stadium.

The Florida booth where free orange juice was constantly given to delegates was one of the most outstanding there. Florida Lions also attracted attention with the Seminole costumes which they wore during the day and while on duty at the booth. Florida placed fourth for the Indian attire.

Roberts hopes the distinction of riding down Chicago's main street, Michigan Avenue, astride a prancing horse. He was grouped with other district governors in the elaborate parade Monday morning.

An outstanding event of the convention was "Let's Go Tex-ico," which was scheduled at least five to ten times as toxic to flies as DDT and methoxychlor, and its killing power may last for years.

Action starts immediately upon application of the spray. In tests at the Iowa State College, it was found that 100 percent of the flies the first two days.

Isotox-lindane is not poisonous to livestock if used according to specified dosage requirements.

Approved by the USDA for use inside cattle barns, it proves harmful if fed through troughs and water are protected while spraying. A warning says it shouldn't be put on forage to feed to livestock being fattened for market.

Wave Length OK Thru Holland For Fire Control Board

Complete Hook-Up For Benefit Of Glades Communities

When the State Highway Patrol changed its radio frequency in accordance with the Communications Commission's order, the Everglades Fire Control applied for a frequency of its own and purchased discontinued equipment from the Highway Patrol. After a lapse of several months no action was obtained from Washington, and an appeal was made to Senator Holland with the result that the permit was granted within a few days.

In the new set-up Chief Bender has made an arrangement with the City of Belle Glade to have a combined office of the Highway Patrol and the Fire Control receivers in the Highway Patrol Office in Belle Glade, so that constant communication may be maintained.

This arrangement allows the Highway Patrol and the Fire Control to maintain communications always with each other.

Chief Bender, as a member of the Disaster Relief Committee of the Red Cross is making arrangements to have in the central office a receiver capable of listening in on the radio reports from the hurricane camps around the Lake to the Cleveland office, for storm information and to receive reports of wind direction and velocities as well as barometer readings.

With Chief Bender's equipment, the Highway Patrol and the Fire Control will be equipped with a two-way voice radio, this set-up should always receive the Glades of communication.

The everyday working of the system allows Belle Glade's police to keep informed of the Highway Patrol's activities as far as it affects them, and assures any report of fires made by the Highway Patrolmen to be immediately transferred to the Fire Control.

Disaster Chairman, Bill Young believes that if Uncle Sam calls the local Electronic group of the Navy Reserve and thus denies us their services.

The present set-up of Chief Bender's will take over and furnish all needed facilities.

Accident Victim Buried On Sunday

Funeral services for Wilbur Raymond Cooke, victim in an accident which occurred on the Palm Beach Road a week ago Thursday, were conducted Sunday at the Merry Funeral Home Chapel in Palm Beach.

Burial took place in the afternoon in Tangerine cemetery at Lake. Reverend L. S. Vandewater, pastor of the Methodist Church, officiated.

Cooke is survived by his parents, Mr. and Mrs. W. R. Cooke, of Unstallin, and a brother, Winston.

PB County Reaches 97.5% Bond Quota

O. B. Carr, Chairman of the U. S. Treasury's Savings Bonds Committee for Palm Beach County announced recently the report of the final week's sales activity.

The promotion period of the campaign which featured an exact replica of the Liberty Bell as its symbol, extended from May 15 to July 4.

The accounting period ended July 17 to permit the processing and transfer of sales resulting from the drive activity.

The final week's report added \$3,305,006 to the state total which brought the state sales to \$9,017,325 or 109.12 percent of its quota of \$8,265,000. The people of the nation bought 110 percent of the national quota, and the state of Florida 97.5 percent.

In all, 44 of Florida's 67 counties oversubscribed their Independence Drive quotas.

Palm Beach County Savings Bond Chairman O. B. Carr said that he had received an expression of gratification from State Advisory Chairman V. H. Northcutt of Tampa and R. L. Markham, State Director of the Savings Bonds Division, for the commendable participation by the people of Florida and of Palm Beach County. They point out that individuals in Florida have increased their holdings of Savings Bonds by more than \$9 million which sum will be worth more than \$12 million if held to maturity in 1960.

PICKETT TO DRAW UP MAP OF PAHOKEE

The Pahokee city council voted to have a map of the city made at their next meeting.

John T. Pickett, Sr., city engineer, will draw up the map showing all streets, houses and their numbers.

City To Pave N. W. 4th Street In County Agreement

The city agreed to include paving of N. W. Fourth Street, of the football field, in their street program as part of an agreement with the county. Action was taken at city commission meeting Wednesday.

Frank O. Hobson, principal of Belle Glade High School, reported he had contacted county Commissioner Paul Rardin concerning the project.

Hobson said the county has agreed to put down the rock bed if the city will furnish the surface.

Street Commissioner Junius Harris reported that another paving agreement with the FEC Railroad was beginning.

The agreement calls for the city to pave company roads in the parking house area if the railroad pays for materials.

City Clerk Frank Anderson announced that those planning to run for office in the city general election September 12, should file candidacy August 7-23 in his office. He also stated that registration books will remain open until September 1, and that the number of residents registered so far is low.

The commission authorized Commissioner W. L. Collins to fence in the water plant for protection against intruders.

A traffic ordinance combination and violations was presented for first reading.

D. G. Herring was appointed city planning board member. He will place vacated by W. P. Risk.

County Approves \$2,691,253 Budget

Adoption of a \$2,691,253 operating budget for Palm Beach County for the 1950-51 fiscal year, was approved Monday by the county commission which turned down a request from County Registrar DeWitt Upthegrove for more funds to operate his office.

Approval of the budget was moved by Commissioner John Pickett and seconded by Vice Chairman Paul Rardin. It was approved unanimously.

The request from Upthegrove for more funds and a letter to the board asking for a cut in the amount budgeted for operation of veteran service offices in the county, was also considered.

Insistence by Upthegrove, supervisor of registration, that he be given more money to operate his office was also considered.

A number of activities set up by special legislative acts, was not considered favorably by the commission.

Mrs. Harper's letter, which requested assistance to be conducted from a central office instead of several offices in the county, was referred to the County Veterans Service Committee, the group who administer funds budgeted for, vet. aid. The amount this year, \$16,500, a \$3,500 decrease from last year.

Insistence by Upthegrove, supervisor of registration, that he be given more money to operate his office was also considered.

City Of Belle Glade Gets \$39,026 From Cigarette Tax In Six Months Time

Approximately Twice Amount Received Through Its Own Tax Of Smokes

The pains of Florida cities seem to have found some relief from homesteaded exemptions in the cigarette tax imposed by the last legislature; Belle Glade has received for six months, April, at a rate twice as much as it collected when it had its own tax—\$39,000.

South Bay garnered \$5,344, while Pahokee was taking \$14,183, which figures reduced by the last legislature; Belle Glade has received for six months, April, at a rate twice as much as it collected when it had its own tax—\$39,000.

There are 19 cities receiving more than \$100,000 each, which come in the \$100,000 bracket. Miami got better than a million, \$464,000 while Tampa, St. Pete and Miami Beach were getting more than \$300,000 apiece, Orlando came in with \$186,259, while West Palm Beach pushed \$167,000, Coral Gables came in with \$110,000; Pensacola pushed \$100,000, while Sarasota got \$90,000.

The Legislators provided that all cities which reduced the increase to each city of its cigarette tax, if it had a tax previously.

The State Tuberculosis Board receives the monies collected in counties outside of municipalities. The cities will receive about \$12,000,000 but there is no figure on what the Tuberculosis Board receives from the counties.

Belle Glade has a homestead exemption last amounting to \$1,496,880, in '49, which would bring into the City's treasury taxes in the amount of

Seven Of Fourteen Glades Registrants Report For Uncle

Ten Negroes and four white registrants were notified to be ready for Uncle Sam's consideration for military duty at the county clerk's office here at the Chicago Stadium last week. Petry received Walter C. Fisher, Queenton, Ontario, Canada.

The convention concluded one of the most successful years in the history of Lions International, according to the report made by Melvin Jones, Chicago, president of the Association. He reported the addition of 806 new Lions Clubs and 21,415 members. He stated also here at the Chicago Stadium last week. Petry received Walter C. Fisher, Queenton, Ontario, Canada.

One white boy, Paul Allen Davis, was transferred to another local board for consideration and four Negroes failed to report. That "Failed to Report" notation on the list means was to be sent to the FBI's are ready to get after them. Because of the lack of needs in the past year for inductees, the board has become a bit careless about their address; some of them will suffer because of it too.

Says Pangola Grass Is Easily Followed By Cultivated Crop

Pangola grass, an improved pasture grass introduced into Florida four years ago from South Africa which is drawing nation-wide attention, 9-45 is grown as a rotational crop with vegetables and other farm crops, according to Dr. E. H. Hodges, agronomist with the Range Cattle Experiment Station.

Dr. Hodges came to this conclusion following an experiment which he began in 1946. Using four-fifths of an acre of sandy land as an experimental plot, Dr. Hodges planted Pangola grass in the spring of 1948. Summer rains in 1949 made possible a bumper crop of Pangola, which was then planted in 9-45.

In the fall of 1949 the agronomist broke up the Pangola soil with a 26-inch bed, followed by two cuttings, a month apart, with a 24-inch tandem disk. During January of this year he planted rice cutters on the experimental plot.

Herbert C. Petry, Jr., Carizozo Springs, Texas, is the new president of The International Association of Lions Clubs (Lions International). He was elected by unanimous vote at the 33rd annual convention of the organization which closed here at the Chicago Stadium last week. Petry received Walter C. Fisher, Queenton, Ontario, Canada.

Florida Safety Record To Be Compared Aug. 1

Floridians will learn August 1 how their highway safety effort stacked up against those of other states during 1949.

Don Hill, southern representative of the National Safety Council, will come here to give Governor Fuller Warren and other officials the Council's comprehensive reports on Florida's progress in accident reporting, traffic and highway engineering, public information, traffic legislation, motor vehicle death record, driver licensing, safety organization, school safety and traffic law enforcement.

Nat H. Rambo, executive secretary of the Governor's Highway Safety Conference, said here this week he was afraid Florida's "traffic accident report card" would not be very good for 1949 except in the field of driver licensing.

Florida's driver licensing program, supervised by Lt. C. W. Keith of the Florida Highway Patrol, ranked first in the nation for 1948 and is expected to be at or near the top for 1949.

But Rambo is confident Florida can make a much better showing when the time comes for the National Council to make its 1950 inventory of this state's safety drive. By that time, the Governor's Highway Safety Conference—organized June 1 and set for Tampa September 28-29—will have been held and an intensive campaign

for better traffic education, engineering and enforcement should begin to pay dividends.

"We believe an active, aggressive Florida Citizens' Safety Council will be formed as a result of the Conference in September," Rambo explained. "Using the National Safety Council's inventory as a blueprint, I believe the Council can solve a great many of Florida's safety problems before the end of 1950 and a great many more during 1951."

Last year's inventory, covering 1948, found only a few praiseworthy points in the Florida safety picture. Besides the driver licensing program, the National Council commended some parts of Florida's school traffic safety education effort and noted some improvement over 1947 in the field of accident reporting and recording.

Officials and safety leaders from throughout Florida will be invited to attend the August 1 session to hear Hill analyze Florida's traffic problem and the steps needed to solve it.

Worker Due Percent Wage When Injured On His Job

A percentage of regular wages and medical attention are due workers hurt on jobs, Raymond E. Barnes said in discussing provisions of the Workmen's Compensation Law.

The purpose of this Florida law passed in 1935 was to provide that an injured worker not have to bear the total loss or go through common law proceedings to receive compensation," Barnes said.

Barnes pointed out that the Workmen's Compensation Division of the Commission handles no money and does not act as an insurance agency. Its function is supervisory—to make certain that the provisions of the law are carried out.

To give some ideas as to the size of the program administered by the Commission Barnes said there were over 88,000 work injuries in the state last year. These accidents cost insurance carriers and employers over \$5 million.

As a part of its activities in administering the Law, the Commission provides safety inspection and safety courses for Florida plants. It also makes analyses of accidents and fatalities by source and industry to assist in establishing better safety programs and practices.

The chairman said that the cooperation of Florida industry in these expanded safety activities of the commission is already paying off as indicated by an over-all reduced insurance rate of 1.5 percent which became effective May 1 of this year.

Employer Pays For Not Following Law

Failure to require an employee certificate for a 17 year old boy cost one Florida employer over \$1,200 according to report on Child Labor activities by the Florida Industrial Commission.

Although covered by workmen's compensation insurance, which paid medical, hospital, and loss of wages for the loss of a thumb, a sawmill company was also responsible for the same amount paid by the insurance company because it did not have a work permit on file for this youth at the time of the accident.

The Workmen's Compensation Law provides that when illegally employed minors are injured benefits are doubled, with the employer and not the insurance carrier responsible for the additional payment.

The Commission reports that 203 or over half the 408 young persons who were injured on the job in the last six months did not have work permits.

Total costs of injuries during this period ran into almost \$18,000. Employers of those minors working illegally paid out over \$2,000 in double compensation.

The wholesale and retail trade industry report the greatest number of injured minors in the last six months with 152 cases. Others were agriculture, 82; construction, 59; manufacturing, 51; services, 47; public utilities, 11; and government, 6.

Nine persons under 18 employed as laborers on construction jobs were injured, and youths hurt while working as clerks in wholesale and retail establishments totaled 36. Their highest total were general helpers in all industries which recorded 32 casualties.

Cuts, lacerations, and punctures were the most common of the injuries. There were also a number of bruises, abrasions, sprains, and strains.

New On-Farm Training Ruling Not Effective To Old Members

Veterans who started GI Bill institutional on-farm training before May 15 will not be affected by a recent Veterans Administration ruling that their farms must include tilling of the soil as a basic activity.

S. Parker, VA's Miami Regional Manager, announced today.

Their farms, however, still must meet all other requirements of the law establishing the farm training program and of previous VA regulations.

The farms of veterans enrolling on or after May 15, Mr. Parker pointed out, must meet the new criteria in order for veterans to remain in training.

Institutional on-farm training, VA explained, is a program that combines classroom instruction with actual experience on the veterans farm.

According to the ruling which applies to newcomers, a farm or other agricultural establishment on which GI Bill training is offered must include "the cultivation of the ground and raising and harvesting of crops, including fruits, vegetables,

pastures, etc."

The farm also may have, as an activity of greater or lesser economic importance, "the feeding, breeding and management of livestock, including poultry."

But single-enterprise establishments "engaged solely in breeding, raising and sale of animals and poultry" do not meet the requirements of the law, the VA regulations continue.

Neither do establishments engaged primarily in the processing, distribution or sale of agricultural products. It adds: "Veterans who started training on or after May 15 on farms which fail to meet VA's requirements may not continue on the institution on-farm plan. Instead, they may train either on-the-job or in schools."

HEAT'S ON MILDEW

Mildew, a source of annoyance and economic loss to Florida householders, is a new victim of science through the simple application of heat.

Associate Professor of Chemical Engineering, S. S. Block, of the University of Florida's Engineering and Industrial Experiment Station, has found that heating the air of closets

(the most common location of mildew) with an electric heater gives better results for stopping mildew than any other method studied.

Dr. Block suggests that the heater be placed on the floor of the closet so that the heat will be evenly distributed. He warns users to take precautions against possible fire hazards involved in the process.

only the FORD TRACTOR has the **PROOF-METER**

Now Standard Equipment on Every New Ford Tractor **BUY ON PROOF** Instead of Promises!

Why guess about tractor performance—before you buy or after you buy? Now guesswork is no longer necessary! The new Ford Tractor Proof-Meter shows performance, efficiency and economy right before your eyes on the dashboard. It will pay you to see this Proof-Meter—TODAY! Only the Ford Tractor has it!

HAY PRODUCTION NOW PRACTICAL WITH NEW HEAT CURING OUTFIT

A new mechanical hay drier developed in the engineering department of the University of Florida College of Agriculture bids fair to help farmers overcome the rainy season handicap and perhaps cut down on their 10 million dollar annual imports of winter roughage.

Florida farmers can grow hay crops. But most of them mature during the summer rainy season. Field curing has been almost impossible and barn curing impractical because of the expense of installing and operating artificial curing devices.

The new outfit, developed by J. M. Myers, assistant agricultural engineer with the Agricultural Experiment Station, uses heat and is not expensive to install and operate. It has the additional advantage of being an ideal seed drier as well. Twenty-five already are in operation and have proven practical in curing most kinds of hay.

The new device can be installed in practically any barn. It consists of a heating unit, a tight sub-floor, a slatted floor six or eight inches above this, and dividers and ducts to carry the heat where it is wanted. If the barn is well ventilated the moisture driven out of hay or seed has a better chance to escape.

The heating unit consists of a

State Accepts Two 4-H Nat. Awards Programs

Two highly important national 4-H awards programs—Meat Animal and Soil and Water Conservation—have been accepted for the current year by the Florida State Club office.

Meat Animal Club work is provided incentives to help encourage 4-H boys and girls in livestock club work. Awards in the Meat Animal activity include gold field medals, gold watches, Chicago 4-H Club Congress trips and \$300 college scholarships, on county, state, sectional and national levels, respectively.

The Soil and Water Conservation program is now set up for two age groups—one for boys and girls 15 to 21 years old, and the other for those 10 to 14, inclusive. The older group is required to complete a more comprehensive project.

Medals for county winners, and gold watches and \$25 Savings Bonds for State champions are provided by Firestone Tire and Rubber Company. Sectional winners get Chicago Club Congress trips. National awards are \$300 college scholarships. This revised program is the result of combined planning by representatives of the Cooperative Extension Service, Soil Conservation Service, Firestone, and the National Committee.

Lloyd Bradley, of Tallahassee, Manatee county, won both national and State honors last year in the Soil Conservation program. Charles Congdon, of Gaines City, Polk County, was the State champion in the Meat Animal project.

Complete information on these programs may be obtained from County Extension agents.

U. S. Coast Guard Begins Enlisted Procurement Prog.

The U. S. Coast Guard began an enlisted procurement program July 18 for enlisted personnel from among former U. S. Coast Guard and Coast Guard Reserve personnel in active duty.

Enlistments will be made in the Volunteer Reserve for inactive duty without physical examination other than visual examination which will be given by the personnel in the U. S. Coast Guard Recruiting Office. Enlistment or reenlistment of eligible personnel into the U. S. Coast Guard Volunteer Reserve will be made in the same pay grade as that held upon their discharge from the U. S. Coast Guard or Coast Guard Reserve.

Former U. S. Coast Guard and Coast Guard Reserve enlisted personnel who are now college graduates or those who through technical or professional knowledge have gained qualifications for a commission should make application for commission in the U. S. Coast Guard Volunteer Reserve on inactive duty. Enlistment in the Volunteer Reserve will be advantageous in being considered for a commission.

For further information on enlistment in the U. S. Coast Guard Volunteer Reserve and for commission in the Volunteer Reserve contact the U. S. Coast Guard Recruiting Office nearest your home.

U. S. Coast Guard Recruiting Office in the 7th Coast Guard District are located in the following cities: Atlanta, Ga., Charleston, S. C., Jacksonville, Fla., Miami, Fla., Savannah, Ga., and Tampa, Fla.

FSU Student Discovers 18,000-Year-Old Jawbone

War news got pushed aside in Tallahassee briefly as Wendell Barnes of Lake City, FSU student, turned up an 18,000-year-old mastodon jawbone. He was cleaning out parts of the Wakulla river, flowing from famed Wakulla Springs, when he uncovered a three-foot jawbone dug deeper and found another and part of the teeth. Mastadons were common in this area 6,000 years ago, says the state geological survey, but vanished because of enemies, swamps or change in climate.

Wendell Barnes, 21, of Lake City, Fla., is a senior in the College of Arts and Sciences at FSU.

State Needs New Dist. Lines, Says Fla. C. Of C.

Striking variations in population size and growth in the six congressional districts in Florida stress the increasing need for new district lines in the State, the Florida State Association of Commerce pointed out yesterday.

Florida's most populous district is reported in this week's business review of the State Association of Commerce and Industry, as having 24 percent of the 2,734,116 total population of the State. The State's smallest district includes less than that number of persons.

Further, the two most populous districts in Florida contain 45 percent of the total State population. All figures are preliminary but final census totals will not vary.

Rates of growth of the population of the districts during the last decade have varied from 82 percent to 27 percent. The State's population increased 44 percent during the decade.

County make-up of each district, total district population and the ten-year rate of growth follows:

District one, 642,537 total, 46 percent. Hardee, Hernando, Highlands, Hillsborough, Manatee, Pasco, Pinellas, Polk and Sarasota.

District two, 439,641 total, 27 percent. Alachua, Baker, Bradford, Clay, Columbia, Dixie, Duval, Gilchrist, Hamilton, Lafayette, Levy, Madison, Nassau, Suwannee, Taylor and Union.

District three, 400,754 total, 31 percent. Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Okaloosa, Santa Rosa, Wakulla, Walton and Washington.

District four, 521,449 total, 82 percent. Collier, Dade and Monroe.

District five, 390,385 total, 35 percent. Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Putnam, St. Johns, Seminole, Sumter and Volusia.

District six, 285,350 total, 53 percent. Broward, Charlotte, DeSoto, Glades, Hendry, Indian River, Lee, Martin, Okechobee, Palm Beach and St. Lucie.

State Needs New Dist. Lines, Says Fla. C. Of C.

Striking variations in population size and growth in the six congressional districts in Florida stress the increasing need for new district lines in the State, the Florida State Association of Commerce pointed out yesterday.

Florida's most populous district is reported in this week's business review of the State Association of Commerce and Industry, as having 24 percent of the 2,734,116 total population of the State. The State's smallest district includes less than that number of persons.

Further, the two most populous districts in Florida contain 45 percent of the total State population. All figures are preliminary but final census totals will not vary.

Rates of growth of the population of the districts during the last decade have varied from 82 percent to 27 percent. The State's population increased 44 percent during the decade.

County make-up of each district, total district population and the ten-year rate of growth follows:

District one, 642,537 total, 46 percent. Hardee, Hernando, Highlands, Hillsborough, Manatee, Pasco, Pinellas, Polk and Sarasota.

District two, 439,641 total, 27 percent. Alachua, Baker, Bradford, Clay, Columbia, Dixie, Duval, Gilchrist, Hamilton, Lafayette, Levy, Madison, Nassau, Suwannee, Taylor and Union.

District three, 400,754 total, 31 percent. Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Okaloosa, Santa Rosa, Wakulla, Walton and Washington.

District four, 521,449 total, 82 percent. Collier, Dade and Monroe.

District five, 390,385 total, 35 percent. Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Putnam, St. Johns, Seminole, Sumter and Volusia.

District six, 285,350 total, 53 percent. Broward, Charlotte, DeSoto, Glades, Hendry, Indian River, Lee, Martin, Okechobee, Palm Beach and St. Lucie.

FSU Student Discovers 18,000-Year-Old Jawbone

War news got pushed aside in Tallahassee briefly as Wendell Barnes of Lake City, FSU student, turned up an 18,000-year-old mastodon jawbone. He was cleaning out parts of the Wakulla river, flowing from famed Wakulla Springs, when he uncovered a three-foot jawbone dug deeper and found another and part of the teeth. Mastadons were common in this area 6,000 years ago, says the state geological survey, but vanished because of enemies, swamps or change in climate.

Wendell Barnes, 21, of Lake City, Fla., is a senior in the College of Arts and Sciences at FSU.

FARM SAFETY WEEK CALLS ATTENTION TO UNNECESSARY LOSSES

More than 17,500 farm people will die from accidents, an additional 1,500,000 will receive disabling injuries, and 35,000 farm buildings will be destroyed by fire this year if past statistics hold true, according to figures from the National Safety Council.

Louis T. Nieland, farm safety specialist with the Florida Agricultural Extension Service, says this appalling accident loss among rural people, which costs the nation approximately one billion dollars annually, is what prompted President Truman to proclaim July 23 through 29 as National Farm Safety Week.

In addition to the National Safety Council and U. S. Department of Agriculture, organizations cooperating in the week include the National Fire Protection Association, the Farm Equipment Institute, the American Farm Bureau Federation, the Farmers' Union, the National Grange, and other groups.

In his proclamation the President calls on organizations and individuals interested in farm life and the welfare of farm people to join in a continuing campaign designed to promote the safety of workers on the farm.

"The theme for the week, 'Learn and Obey Farm Safety Rules,' suggests individual responsibility for learning and observing good rules for the safety of one's self and others," says Secretary of Agriculture Charles Brannan. The Secretary adds, "In addition to the dollar cost of farm accidents in human misery is incalculable."

Representing the equivalent of an annual tax of \$35 per year to every farm resident throughout the country, most of these farm accidents can be prevented. The goal of the National Safety Council for 1950 is to reduce the farm accident rate by 10 percent. This alone would save 1,750 lives, prevent 150,000 disabling accidents and save \$100,000,000.

To help prevent this unnecessary loss, the National Safety Council advises farm families to practice farm safety rules, make their farms and homes safer by resolving to do the right way, and make farm safety a family affair every day of the year.

Corn Behind Lupine Stands Dry Weather

Corn following lupine in a rotational program will withstand dry weather conditions more successfully than planted without benefits of a system, reports Columbia County Agent James Watson.

This was proved during the recent drought in the county that reduced an anticipated bumper crop to only a small yield.

Lieutenant Commander Overland has requested that his group be recalled as a unit so these friends of long standing may stay together during any assignment they may get.

SOUTH BAY BEAN CITY LAKE HARBOR
Miss Norma Jean Armstrong left recently for New York where she will intern for a year at the U. S. Marine Hospital on Staten Island as Junior Dietician.

Mr. and Mrs. R. L. Barrett and son Richard have returned from a weeks vacation at Riviera Beach.
Rayford Smith is on a 30 day leave from the U.S. Navy and is visiting his parents Mr. and Mrs. Jay Smith at South Shore Plantation.
Miss Lucretia Campbell who has been visiting her grandmother Mrs. R. R. Roadman, Sr., at Bradenton is expected home the last of the week.
Mr. and Mrs. John Stuart of Tampa were the week end house guests of Mr. and Mrs. C. E. Crichtfield and were taken several sight-seeing trips to the lower east coast and various other points of interest.

Mr. and Mrs. Billy Jeffries of West Palm Beach visited their respective parents, Mr. and Mrs. W. M. Jeffries, Mr. and Mrs. H. R. Layfield over the weekend.
Joe Boatwright has re-enlisted in the U. S. Navy for 3 years according to word received here by his sister Mrs. J. K. Willis.
Mr. and Mrs. R. E. Green of Clearwater, who are visiting Mr. and Mrs. Claude Hutson in West Palm Beach spent the day Tuesday with Mrs. Laura Crow, Mr. and Mrs. E. M. Willis.
Glen Rutledge of Okeechobee is visiting his cousin Bobby Willis this week.
Mr. and Mrs. J. W. Marlowe of Atlanta, Ga., are house guests of Mr. and Mrs. Clayton Waters. A dinner party in their honor was arranged at the Waters home Monday evening. Other guests were Mr. and Mrs. G. M. Waters, Jr., and family, Mr. and Mrs. James Converse and family, all of Clewiston, Mr. and Mrs. W. R. Sullivan and children of Belle Glade, Mr. and Mrs. M. J. Waters and family of South Bay.

Mr. and Mrs. Frank B. Willis, Frankie, Dan, Dick and Doris are expected home the last of the week from a visit with her mother Mrs. Ida Hoover in St. Augustine.
Mr. and Mrs. C. A. Whitman, Sr., and Miss Myrtice Gilman left this week for a visit with relatives in Macon, Ga., and also with Mr. and Mrs. Berthold Pelka at Ranch House, Sugar Leaf Mountain, Hendersonville, N. C.

Mrs. Nellie Moseley and children of Wauchula are visiting her sister, Mrs. C. E. Crichtfield and family.
Kay Waters has returned home from the Belle Glade Hospital where she was under observation last week.
Mrs. Clayton Waters, Mrs. M. J. Waters, Kay and Jack visited Mr. and Mrs. G. M. Waters, Sr., at Goodnow Sunday.
Mrs. Vashli Armstrong has returned to Bean City from a six weeks visit with her brother at Daytona Beach.
Miss Julia Stacey and Miss Letha Stacey have returned to Lake Harbor from Ridgecrest, N. C., where they attended the Baptist Assembly for a two weeks period.
Mrs. Paul Touchstone and two children, who have been visiting her mother Mrs. Cora Marlowe, returned to their home in Fort Myers the last of the week.

I. P. Roberts, owner of Roberts Dairying Service, left last week for Mississippi.
Dr. R. L. Pipes and family are visiting in Holton, Maine.
Mr. and Mrs. Thomas Dostler and Mrs. Eva Kendall of Robertsdale, Ala., were recent guests of Mr. and Mrs. A. N. Lamoureux.
Mrs. R. G. Fisher and daughter Linda last week accompanied her brother Kenneth Tibado and sister Mary Underhill, both of Lake Wales to Duke University Hospital for observation and treatment. Her brother Clarence Tibado, Jr., U.S.N. recently returned from the Hawaiian Islands is the guest of Mr. Russell Fisher in his absence.
Miss Dorothy Higginbotham of

Island Grove was the house guest of her aunt, Mrs. A. B. Barnes and family, last week.
Mr. and Mrs. J. C. Higginbotham, their son and his wife of Hastings were recent week end guests of his sister and brother-in-law, Mr. and Mrs. A. B. Barnes.

The Lions Club dinner last week was served by a group of women from the Church of Latter Day Saints. Lions attending were W. M. Jeffries, Clayton Waters, Frank Willis, W. C. Allen, Cleo H. Higginbotham, R. C. White, J. F. Prevatte, John L. Evans, Melvin Herring.
Melvin Herring left Saturday to join his family at Fort Myers beach for a few days outing.
Applications Open
Application blanks are available at the South Bay Postoffice, according to Postmaster Eric D. Hartline, for application for the position of substitute clerk at the South Bay Postoffice.
Competitive examinations for this position will be announced later. No person will be permitted to take the examination who has not put in an application for the position.
Applications must be submitted to the office of the Regional Director of the 5th U. S. Civil Service at Atlanta, Ga. The closing date for receiving these applications has been set August 9.

Charles English Killed in Accident
Charles Jackson English, age 39, of Miami was instantly killed in a highway accident on State Road 80 between Bean City and Lake Harbor Sunday evening just before dark when the car which he apparently was driving at a high rate of speed failed to take the curve and crashed into a pine tree. The car was demolished.
The accident was witnessed by J. C. Taylor of Fort Lauderdale who summoned officers to the scene. Highway Patrolman Valton Sheffield investigated the accident, and Coroner George A. Williams released

the body to Berry Funeral Home at Pahokee pending advice from relatives of the victim which the officers were trying to locate.

Birthday Party
Mrs. C. E. Crichtfield entertained at a party Tuesday honoring her daughter Genie on her eighth birthday. The children were entertained at games and on the playground equipment on the school yard. Whirlly-stig favors were presented to all the little guests.
Cake, ice-cream and punch was served to Karen and Karol Wilson, Arnold Hudson, Wayne Harrelle, Cecil Byrd, Larry and Pat Bowen, Johnny Willis, Janet and Ginger Crichtfield, Junior Jumpton, and Sandra Campbell of Belle Glade, and their mothers Mrs. Alfred Vadasz, Mrs. Dan Maver of Pahokee, Mrs. J. C. Bowen, Mrs. F. B. Willis, and Mrs. Nellie Moseley of Wauchula.

Board Of Equalization To Meet In South Bay
Wednesday, August 16 at 8 o'clock has been set by the South Bay Town Council as the date when they will sit as a Board of Equalization to equalize the real and personal property taxes for the year 1950 within the Town of South Bay. Any person not satisfied with the assessments on his property may present his case at this time for review by the Town Council.
Attorney Jack O. Johnson has been assigned the task of drawing up a new charter for the Town of South Bay to conform with the best provisions known for a town of this size and the conditions found therein. This charter will be presented at the next session of the State Legislature for approval. Plans are underway for a public hearing on the provisions of the charter well in advance of the meeting of the legislature to acquaint the local citizens with the proposed charter and to hear any suggestions for changes.

Acting police commissioner reported at the last session of the Council that he had issued an order to the police force to stop all illegal gambling within the Town of South Bay and to see that the laws are strictly enforced.
The Town Council also took preliminary steps for the erection of stop-lights at the various intersections of highways and streets within the town limits where traffic is heavy.

Drive home the facts...
Step into a **POWERGLIDE*** Chevrolet and enjoy the **big driving thrill** of the day
... smooth, effortless, no-shift driving at lowest cost!

SET THE LEVER IN "DRIVE" AND GO!
Sit in a Powerglide Chevrolet and enjoy finest no-shift driving at lowest cost. All you have to do is: Set the lever in "DRIVE"—press on the accelerator—and go!

NO CLUTCH PEDAL—NO GEARS!
You'll move smoothly, silently, effortlessly from standstill to top speed, and back to standstill again, depending on the pressure of your foot on the accelerator.

SMOOTH POWER-FLOW AT ALL SPEEDS!
You'll enjoy an absolutely smooth flow of power at all speeds. You'll have unlimited flexibility and change of pace from 1 m.p.h. to top driving speed, without any lag, drag or roughness.

MUCH FASTER ACCELERATION, TOO!
The traffic light says "Go!" ... you press on the accelerator ... and you're away in a flash on a smooth, ever-mounting wave of power, while others are shifting gears.

LEVELS HILLS—MULTIPLIES THRILLS!
You have a 105-h.p. Valve-in-Head Engine* under that hood—most powerful in its field. It flattens hills and boosts thrills, while Powerglide adds safety and ease!

3 DRIVING OPERATIONS INSTEAD OF 15!
Start the engine ... set the control lever ... press the accelerator ... and that's all there is to it! With Powerglide Automatic Transmission, you steer, accelerate and brake as desired with no clutch to touch!

MORE EFFICIENT ON ICE OR SNOW!
Yes, you can rock out of snow or icy ruts with this automatic drive, changing from forward to reverse instantly, without clutching. Other advantages include Emergency Low for extra braking power.

SO MUCH SIMPLER—SO MUCH SAFER!
What ease—and what safety—compared with other drives! Your left foot has nothing to do. Your right foot operates accelerator or brake pedal, as desired. Both hands are free to steer!

FULL CHEVROLET THRIFT IN OVER-ALL DRIVING!
In addition to all these advantages, the new Chevrolet with Powerglide Automatic Transmission brings you traditional Chevrolet economy in over-all motoring. It's extremely thrifty to operate and maintain.

CUTS DRIVER FATIGUE—INCREASES CAR LIFE!
You'll be much more relaxed on long and short trips. Powerglide makes driving easier than ever before. Moreover, it greatly reduces car wear and greatly increases car life!

*Combination of Powerglide Automatic Transmission and 105-h.p. major optional on De Luxe models at extra cost.

Come in... drive a Chevrolet... and you'll understand why it's
FIRST... AND FINEST... AT LOWEST COST!
